

CAMERON M. SERR

camserr@umich.edu | 734.355.8221 | www.linkedin.com/in/cameronherr

PROFESSIONAL SUMMARY

Results-driven Software Engineer with 2.5 years of experience in software development, automation, and DevOps. Skilled in Python, C++, CI/CD in Jenkins and Gitlab. Proven ability to collaborate within cross-functional teams and adapt to evolving project requirements. Currently hold an active Secret Clearance.

EDUCATION

University of Michigan

Ann Arbor, MI

Bachelor of Science - Computer Science, Minor in Applied Statistics

April 2022

Max Tobias Scholarship Recipient

Relevant Courses: Programs and Data Structures, Discrete Mathematics, Elementary Programming, Data Structures and Algorithms, Intro to Computer Organization, Foundations of Computer Science, Web Systems, UX Design, Computer Security, Info Retrieval and Web Search, Human Centered Software Design

SKILLS

Software Skills: Python, R, C++, Rust, HTML, SQL, CSS, JavaScript, Jenkins, Selenium, Git, Flask, Pandas, NumPy

Certifications: AWS Cloud Practitioner

WORK EXPERIENCE

Lockheed Martin Aeronautics

Fort Worth, TX

Software Engineer with Secret Security Clearance

April 2024 - Present

- Collaborated on the development of a Python-based state machine infrastructure, reducing testing costs by 30% and increasing code accuracy by 25%.
- Developed and optimized CI/CD pipelines using Jenkins to automate build, test, and deployment processes, improving development efficiency.
- Automated error correction processes, reducing manual review time by 20%.
- Implementing a new verification method into the testing framework, enhancing test speed and accuracy.
- Leading development of a new capability, aligning requirements across teams, refining middleware, and managing Jira stories and estimates.

Associate Software Engineer with Secret Security Clearance

Nov 2022 - April 2024

- Developed onboard and helmet F35 display features using Python and C++ to increase warfighter performance.
- Built feature to display critical warnings increasing pilots response time by 50%, improving mission readiness.
- Utilized proprietary testing languages in a test-driven environment to ensure product was exceeding expectations.
- Mentor junior developers and collaborate with cross-functional teams to integrate software solutions.

University of Michigan Alumni Association, Camp Michigania

Boyne City, MI

Area Leader, Sailing

May 2019 – August 2022

- Managed 6 employees as well as all training, program scheduling, and any conflicts that arose throughout the summer.
- Led sailing sessions across three levels of difficulty on four types of sailboats.
- Created a program in Python to optimize the scoring for weekly regattas, resulting in over a 70% reduction in time spent scoring.

PROJECTS

File Synchronization Tool

Jan 2025 - Feb 2025

- Designed and implemented a Rust-based CLI tool for efficient file synchronization, leveraging multithreading for performance optimization.
- Developed automated test cases to validate synchronization accuracy and ensure data consistency
